Food taken into the stomach go through rarious chemical changes, and some of hese changes are poisons that must be silted out and disposed of. It is the duty of the kidneys to do this. When the kidneys do not fully perform their vital work, leath may be only a few hours away. Happily, Nature has provided warning tharms telling people when their kidneys are not well. These warthings come in the more of dragging pains in the small of the mack, weak stomach, low spirits, chills, wassen headache, scanty urine and frenausea, headache, scanty urine and fre-ment desire to pass it, short breath, numbsess, cramps, coated tongue, had breath, puffs under the eyes, thin blood, dry skin, ringing in the ears, spots before the eyes and many other symptoms.
